UI Design and Prototyping Report- E-commerce site

IIITRANCHI SHOPPING SITE

1. Introduction

 This is a bootstrap4 based project of E-commerce Site made for the Institute IIIT Ranchi to provide their students a portal to make purchase of college hoodies and essential study related items at Institute Sponsored Prices.

2. User Interface Design and Prototype

• Our Portal will have a Home page, cart/order section so that the user can keep track of items and it will also have login/registration section.

3. Navigation Structure

- Cart button takes the user to cart section
- Orders Takes the user to orders section where user can see details of all the orders placed in near history.
- Login button will start the session
- New user button- Takes you to the registration page
- View details button will take you to single categories pages
