IIIT Ranchi Event Management site
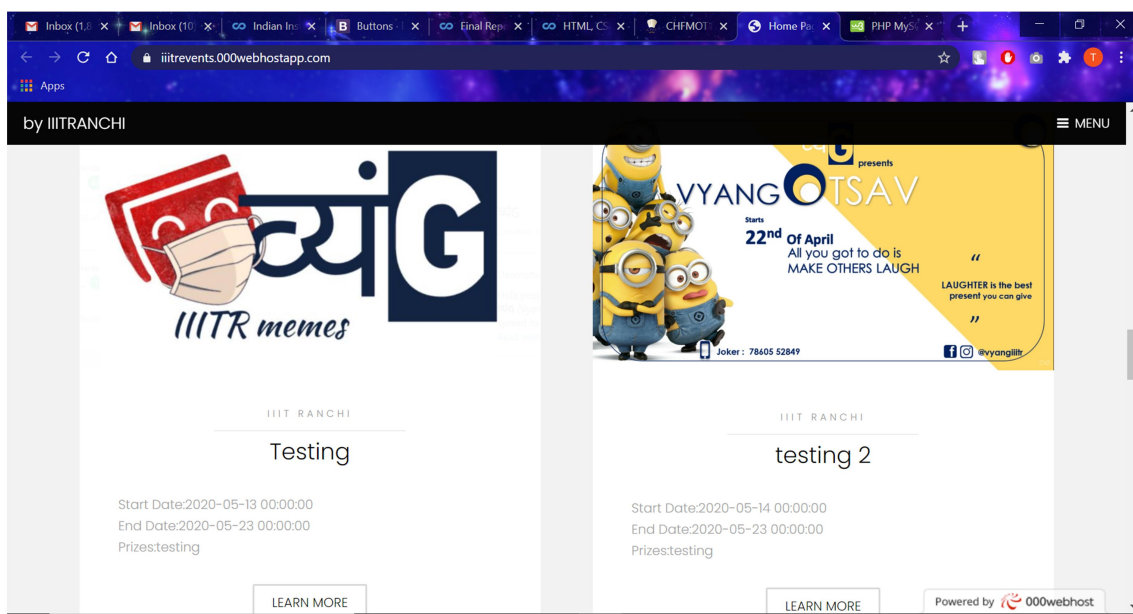

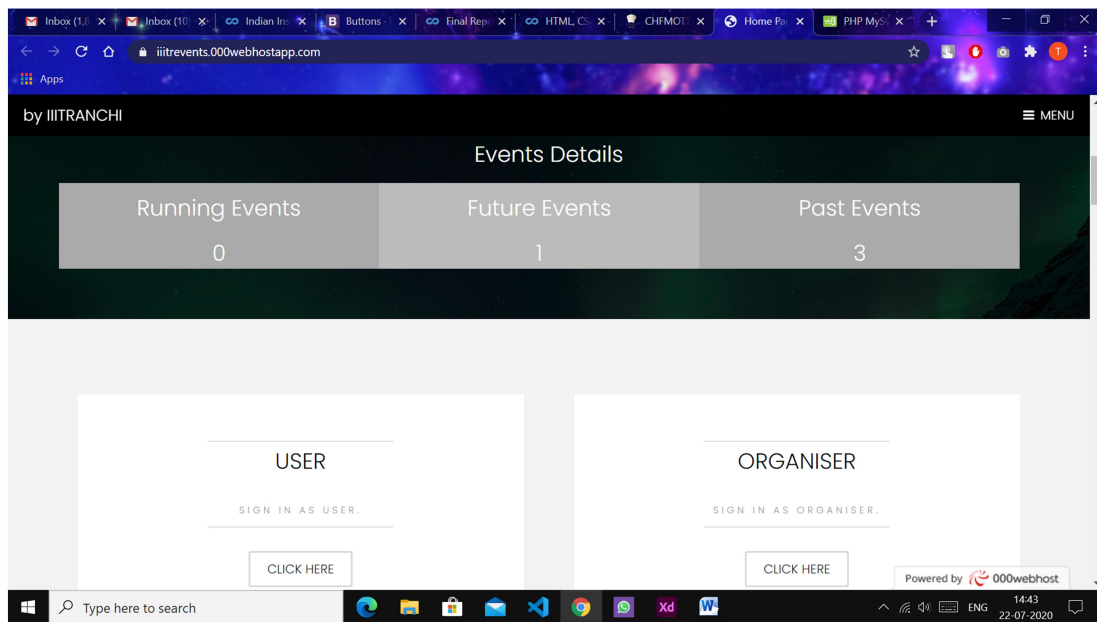

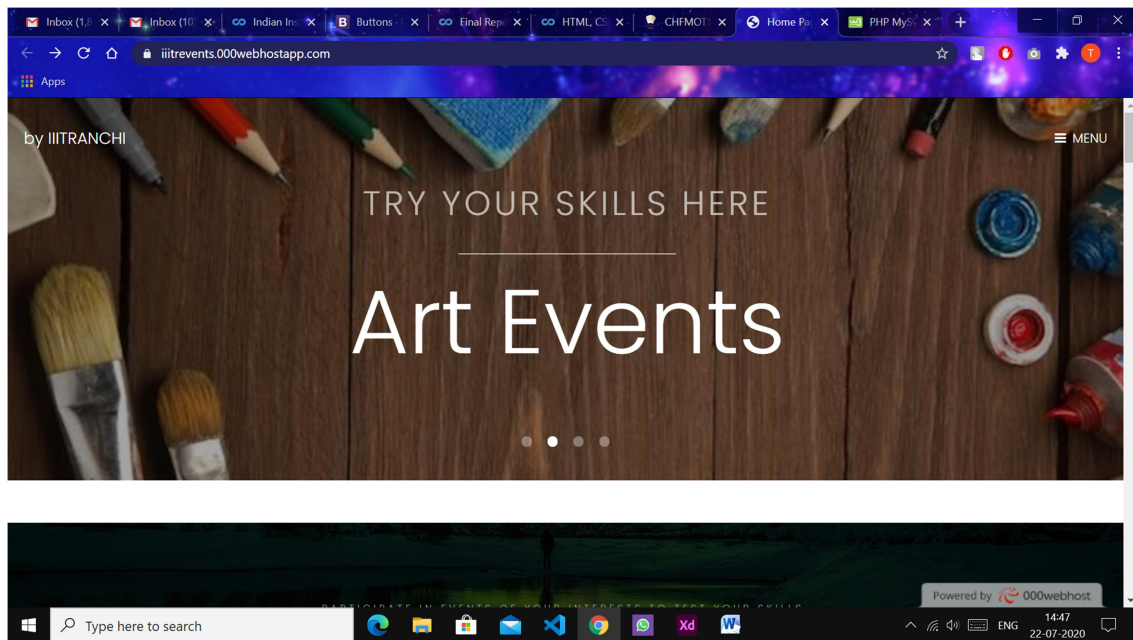

1. Introduction

➢ *ORGANISER PORTAL* : Through this site organisers can promote their events/contests.

➢ *USER PORTAL* : Users can view events (sorted by running-upcoming-past) and can register for them and can view stats though dashboard.

.

➢ *ADMIN PORTAL* : Through admin portal admin can mark or delete any event . Admin have also access to details of all the organisers and users registered in the database.

➢ *GUEST PORTAL* : users can also see details of events without signup/signin.

2. Design and Implementation.

➢ This site is built using bootstrap4 using bootstrap css and js classes along with JQuery 3.5.1 plugin.

➢ Backend is implemented through php.

➢ Database : Mysql

➢ Hosting platform : " 000webhostapp.com"

➢ Unique visitor count is also added at the bottom of the index.html.

➢ A comment section is also added for each event so that users can easily communicate with organisers and can solve their queries with organisers/admin/other users.

3. Conclusions

> Bootstrap made it very easy to keep the front-end mobile or small screen ready without bothering about it much.

> Short coming of the project : exception handling testing work is pending in the project as of now.

> I've planned to make a chat feature between organisers and admin just like comment section but it will be private . And a feature to allow admin to terminate anyone's account.
